↔ MANUAL SLIDING &
STACKING DOORS

Crown Door Automation are the market leaders in the supply, installation and commissioning of automatic sliding and swing doors to the residential and commercial marketplace.

All Automatic Door Operators are to be installed in compliance with the requirements of AS:5007 – 2007.

As well as automation solutions our team can also supply and install complete glass systems using frameless glass sliding door tracks, stacking doors, bi-folding doors, operable walls and other high quality manual systems to compliment your automation requirements.

All products have full manufacturers warranties and will be installed by our experienced team to your complete satisfaction.

We are committed to providing our clients with the highest quality auto door operators and manual door systems. Through the use of superior products and our innovative skills our experienced team will provide you with the access solutions you require.

RESIDENTIAL

HOW EASY WOULD LIFE BE WITH AN AUTOMATIC DOOR OR SCREEN?
IT'S MORE AFFORDABLE THAN YOU THINK.

WE CAN AUTOMATE

An automatic door operator can be attached to your existing manual hinged or sliding door. Our operators are perfect for patio doors, butlers pantries or any internal/external door in your home enabling the door to open and close automatically.

ACCESSIBILITY ♿

An automatic door operator can be attached to any existing sliding and swinging door.

SAFETY

Safety sensors are able to be fitted throughout the entire range of operators.

EASY TO USE

New doors can be provided or existing doors can be activated in many ways. Activation products include wireless push buttons, motion sensors, remote controls and even finger scan technology. Security controls with electronic locking can complete the package.

GREAT FOR PET OWNERS

No need for pet doors. Our operators eliminate the need for a designated pet door. Your pet can come and go freely without any human assistance with "pet mode" and additional pet sensors. We can also program specific opening sizes to suit your pet.

6 STAR ENERGY RATING

Don't let your money out the door. Let us assist in saving on your heating and cooling costs with door automation.

MANUAL DOOR SOLUTIONS

As well as automation experience our team can also provide access solutions using quality manual frameless glass stacking and sliding door systems with the ability to be automated when the need arises.

ALFRESCO AREAS

Our operators are ideal for creating access solutions to your outdoor kitchens and bbq areas. Working with our lifestyle partners we can create the total experience with security and sound controls to make you the envy of your neighbours.
